

## Pod Billing Turnkey Billing Engine

Pod Billing allows you to bill IoT products and services using a tiered billing hierarchy to capture recurring revenue at every stage of the value chain.

We have put 20 years of IoT experience into this fully modular billing engine, allowing you to quickly create subscription-based products and services, manage IoT connectivity, and bill customers, all under one roof.

### Key Features

#### Tiered Billing Hierarchy

Bill for your product end-to-end and manage infinite subsidiary accounts with custom invoicing at every stage.

#### Customized Roles

Assign Finance, Support, Read-only and Admin roles or create custom permissions for your business.

#### Technology Agnostic

Integrate your existing platforms via API and benefit from flexible connectivity and device integration options.

#### White-label layers

Customize branding to fit your corporate identity (or a subsidiary brand) including URL and interface themes.

#### Product/Service Builder

Create user-defined solutions by adding existing devices and build value-added services on top, with subscription billing.

#### Built-in Connectivity

Agnostic connectivity with 600+ cellular networks in 185+ countries. Single/multi-network, Multi-IMSI, eUICC and LPWAN supported.

### Business Benefits

- ✓ Out-of-the-box solution — no need to negotiate connectivity or develop software
- ✓ Simplify, centralize and automate complex IoT billing and expense management
- ✓ Quickly launch products and services to build new revenue streams and long term relationships
- ✓ Enhance your product with a complete connectivity service, including management, analytics diagnostics and 24/7 support
